詐騙陷阱！提醒簡訊驗證碼勿外流

「想麻煩幫個忙，我申請帳號的時候不小心打錯手機號碼，輸入到你的號碼了，可以把剛剛收到的驗證碼告訴我嗎？拜託拜託」

當心這是詐騙集團的手法，有可能損失金錢或個人社群帳號密碼遭到盜用！

所有手機驗證碼的機制，都只會用到使用者個人的手機，也都具有重新發送驗證碼的機制，不會因為輸入錯手機號碼就無法使用，更不需要他人手機協助驗證喔。

Beware efforts to scam information from you, do not share an SMS verification code with a third party

I wonder if you can help me, I recently applied for an account number and accidentally typed in your cellphone number by mistake, can you tell me the SMS verification code you just received. Thank you so much.

Beware! this is a common method used by scam gangs and sharing the verification code could result in the loss of money and/or your personal social account password being hacked and misappropriated for illegal purposes.

All cellphone verification number mechanisms use only the cellphones of those applying. The cellphones of other individuals are never used to help with verification.
